Dear Minister-President Mark Rutte, Ministers, Tweede Kamer Members, Burgemeesters, Journalists and other, who get this e mail

Believe me, I know better, more productive, nicier methods of spending time thaqn writting letters about the face masks, but the Gabinet forces me to do so.

Finally, on Dec 1st the masks will be mandatory. Urra, You've saved our lives! Wait. It's almost one year after pandemic outbreak, when most other countries forced their people to wear masks. Besides we are still alive without such measure, don't You think it's a little bit too late? More, masks became mandatory when, according to official Dutch statements number of info=ected drops, more, Dutch government bought whole tanker, more than 5 mln doses of vaccine. Where is logic there? The government should state an end of pandemic. Maybe the govenment knows something that wants to hide? Another PM, the British one, Boris Johnson is afraid he get Corona fot the second time, maybe he knows that Covid doesn't immunize, so the same, the vaccine can't be succesfull? If that the Dutch government spend a lot of many for purshasing a whole tanker of placebo and somebody should be arrested for defraudation of public money. Anyway, we are safe already, according to RIVM, masks cannot protect against the virus, I can add, masks make a risk of infections themselves, it's time to loose the restrictions (repressions matches the situation much better), Dear Mark Rutte, we don't need Your masks, wear them Yourself!

I have written my opinion, where is the source of masks. These are useless in fight against the pandemic but the crowd in masks is spectacular, perfect toterrify the society, to terrorize, to excuse spending public money for vaccines, pacebos etc. Ok, vaccine is purchased already, the main goal of Action Pandemic is achieved, withdraw the masks. Otherwise it means, that there are another goals. Fireworks are banned, what or who will be the next? ban of alcohol, coffee, political opposition, heavy metal?

Yor Majesty, Mark Rutte, if You feel there's something wrong with Your head just go and visit Your doctor, don't terrorizethe society with Your sick obsessions!

Ban of cigarettes in supermarkets. Oh, as we can see, the Goven=rnment cares about our health, force the masks, ban cigarettes. Yes, cigarettes affrect health but we now the more dangerous, most common health risk factor, a main cause of cancer. I've sent e mail with the link to the publication form Reproductive BioMedicine online, as well as the copy. It's strange, but about 2 weeks ago, after 5 years this publication disappeared from online edition. I've asked the editor, Elsevier B.V. why, but get no answer. It's even stranger, seems like an attempt to censor the science, however not fully successfull, many people red it already, there are many copies aon many computers, and there is a paper edition. I don't think there is any possibillity to send inspectors with scisors to libraries across the world to cut this article. :) Sorry, Holy Inquisition has gone with the wind. Back to the topic, we know the main cause of cancer, but due to prejudices nobody want to start real fight against this disease, even the prevention is exremely easy, available, comfortable. Instead we have fake countermeasures and, mask terror. There was a protest in Spanish schools. Students tried to support one of their discrimined colleagues and found, the half of the society is discrimined, runs out of human rights, why the Dutch media are silent? Prejudices? Corona scrap is more important than human rights and cancer? There should be the storm, widespread public debate!

I know I have no voice to force the government to any actions, nobody cares what I have to say but there is a job for press to start real prevedntion against real diseases. Stop government lunacy, protect us, our health and human rights. And remember the history, otherwise there will be a dictatorship in the Netherlands.

Best regards
Patryk Frankiewicz
